

Sauber Mercedes C9

Scale Motorsport sku#: 8113

The outside frames of each Photo-Etched (PE) tree have been attached to the cardboard backing with a special adhesive. Only the frames have this adhesive, the individual parts are not glued down. The parts are attached to the frame with a double-etched tab that allows for easy removal by cutting with an X-Acto blade or flexing.

We recommend that you use the cardboard backing as a cutting board. Try leaving the photo-etched tree glued to the card for as long as possible, this will help to maintain the integrity of the photo-etch parts during your building activities.

Plate A

- Outer Brake Discs. See Inset #2.
- Shock Heat Shields.
- Rear Crossmember. See Inset # 1.
- Front Radiator Grill goes on Tamiya part C7.
- Air Deflectors go on rear body work, position outside in front of turbo exhaust.
