

Mazda 787B Renown

The outside frames of each Photo-Etched (PE) tree have been attached to the cardboard backing with a special adhesive. Only the frames have this adhesive, the individual parts are not glued down. The parts are attached to the frame with a double-etched tab that allows for easy removal by cutting with an X-Acto blade or flexing.

We recommend that you use the cardboard backing as a cutting board. Try leaving the photo-etched tree glued to the card for as long as possible, this will help to maintain the integrity of the photo-etch parts during your building activities.

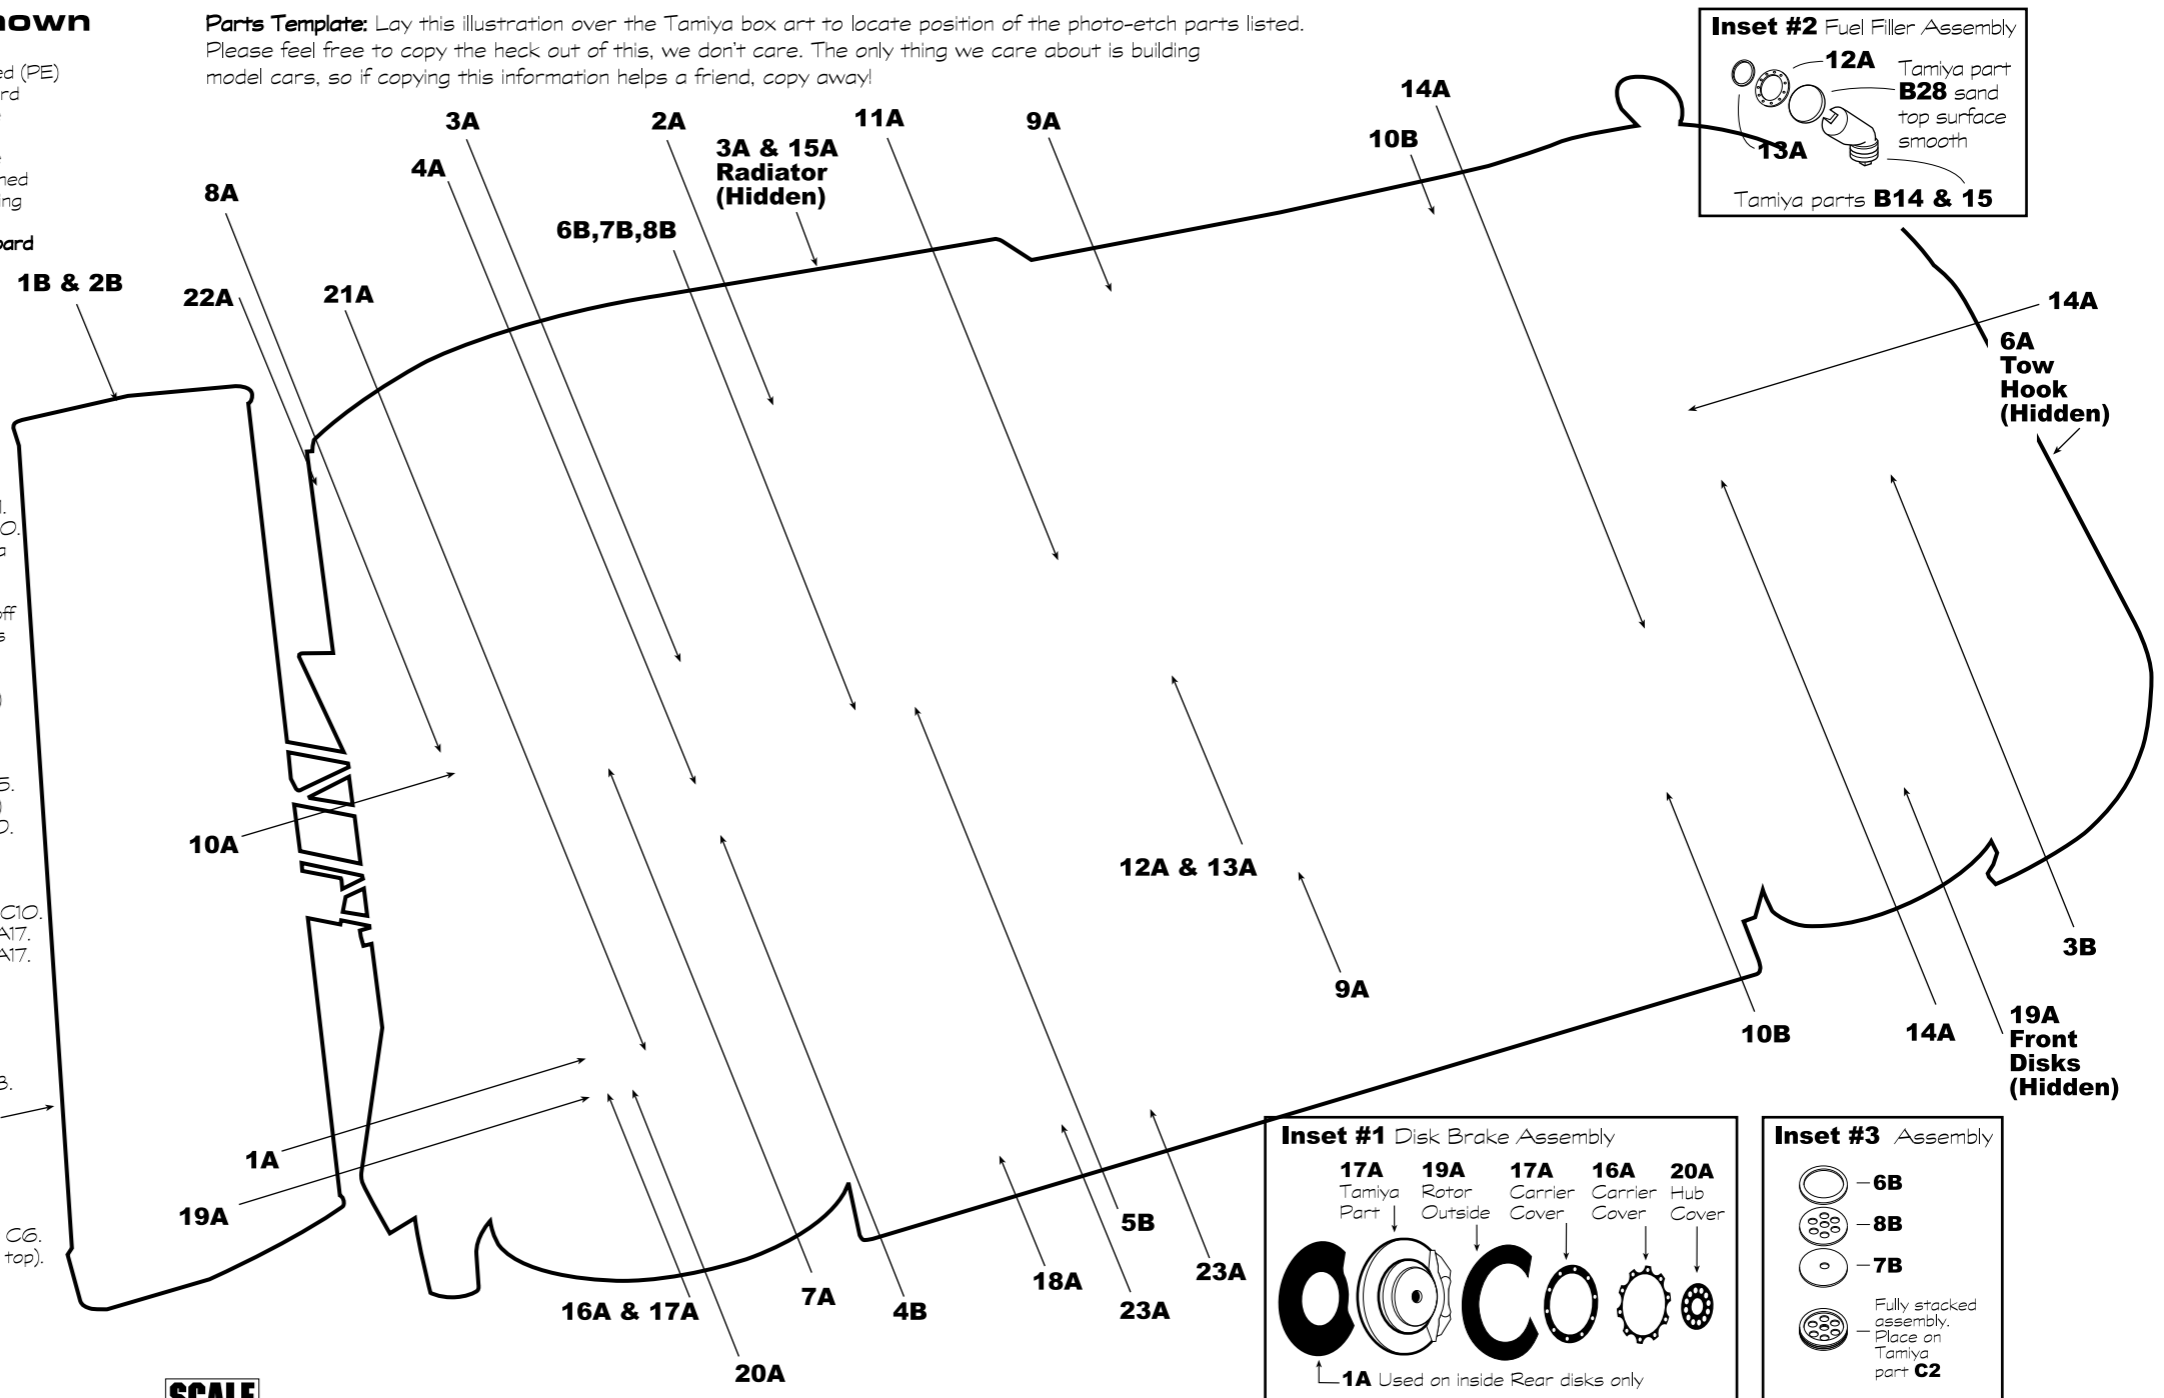

Parts Template: Lay this illustration over the Tamiya box art to locate position of the photo-etch parts listed. Please feel free to copy the heck out of this, we don't care. The only thing we care about is building model cars, so if copying this information helps a friend, copy away!

Plate A

1. Inside Rear Brake Disc. See Inset # 1 Brake Disk Assembly.
2. Radiator Grill goes on Tamiya part C11.
3. Side Radiator Grill for Tamiya part C10.
4. Oil Tank Filler Base Plate for Tamiya part C12, underneath part B27.
